Structure of Education System of St. Lucia, 2000

Highlights

The Education Statistical Digest 2001 consists of fifteen sections, including Early Childhood, Primary, Secondary and Tertiary Education. The following provides a brief summary of its contents.

There are 144 early childhood education centers (ECEC), of which 38 are day care centers. Of these, 20 are government owned and 18 private. Total day care enrolment is 1417, which represents a 7% increase over the last academic year.

There are 106 pre-school centers, all of which are privately owned, with a total enrolment of 4275. This makes an overall ECE enrolment of 5692 students, with a 1:1 ratio of boys to girls. Forty four percent of this enrolment is from the 63 centres in the Castries region. There are 359 teachers, in the pre-school centers with a 1:12, teacher/child ratio.

The island is divided into eight education districts, containing 82 primary and 18 secondary schools.

Primary school enrolment has been on the decline from 1997/98, with an average annual decrease rate of 2.3%. The total enrolment in 2000 is at 28, 618 of which 48% are girls. Dropout rate at the primary level is 0.91%. Male dropout rate is and has been higher than females for the past five years. However 89% of these dropouts are from grades 8 and 9 (senior part of the primary schools). Repetition rate is 2.8%. Over the past 2 years, more male students (62.2%) are repeating grades than females (37.8%). The schools in education district 7 seem to have the highest percentage of repeaters. There are 1052 teachers of which 83% are females and 72% are trained. Presently there is an overall 1:27 teacher/student ratio at the primary schools.

In 2000, of the 4476 primary students who sat the Common Entrance Examinations, 53% were assigned places at secondary schools.

Secondary enrolment is presently at 12738 of which 56% are girls. From 1994/95 enrolments at secondary schools has increased steadily. This is in keeping with the MOE's policy to achieve universal secondary education by the year 2005/06. About 59.2% of our 12-17 year olds are currently enrolled at public secondary schools. There are 678 teachers at the secondary level of which 62% are females. About 64% of the teachers are trained, and 54% are graduates.[?] Only 31% of the secondary school teachers are trained graduates. The overall student/teacher ratio is 19:1.

Enrolment in Tertiary institutions are being recorded from mainly two institutions in the formal education system, namely Sir Arthur Lewis Community College (SALCC) and the Post Secondary division of the Vieux-Fort Comprehensive Secondary School. The total enrolment (excluding continuing education department at SALCC) is 1687 of which 61% are females. The continuing education department has an enrolment of 2371 students.

[?] Holds at least a bachelors degree

The Education system also consists five special education centers, catering for learning, hearing, visual and mental disabilities. Total enrolment has increased from 162 in 1999/00 to 227 in 2000/01.

There are five private primary and three private secondary schools with enrolments of 710 and 452.

There are 21 adult education centers dispersed throughout the northern, eastern and southern sides of the island. In 2000/01 a total enrolment of 729 adult learners were recorded, with 69% females. This enrolment represents a 9% increase over last year.

Technical Notes on Concepts and Methods

1. Reference Point/Period

- ✍✍Population : Population data are given for the middle of the calendar year.
- ✍✍Enrolment : Student data are given for the last school day of October of a given academic year.
- ✍✍Teachers : Teacher data are given for the last school day of October of a given academic year.
- ✍✍Expenditure: Financial data are given for the financial year from April to March of the following year.
- ✍✍Gross Domestic Product (GDP): GDP data are given for the calendar year.

2. School Capacity

- ✍✍Physical capacity of a school is estimated at 35 pupil/students per classroom and 15 square feet per child in case of hall spaces.
- ✍✍In case of double shift schools, capacity is measured in terms of 70 pupils/students per classroom.
- ✍✍If enrolment of a school is more than its capacity then it is a case of over utilization of physical capacity.
- ✍✍If enrolment of a school is less than its capacity then it is a case of under-utilization of physical capacity.

3. School Size

- ✍✍The size of a school is measured in terms of number of pupils/students enrolled on the last school day of October of a given year.
- ✍✍Average size of a school is computed by dividing total enrolment by number of schools in a given area.

4. Teacher Utilization

- ✍✍Child/Teacher ratio is the number of children per teacher in a Pre-school centre.
- ✍✍Pupil/Teacher ratio is the number of pupils per teacher in a Primary school.
- ✍✍Student/Teacher ratio is the number of students per teacher in a Secondary school.
- ✍✍The above ratios are calculated by dividing total enrolment by the total number of teachers in the school/centre.
- ✍✍The Principal of a school is not included in the number of its teaching staff.

5. Trained Teachers

- ✍✍A trained teacher is one who has successfully completed a recognised course in teacher education methods and teaching techniques.

6. Graduate Teachers

✍✍ A graduate teacher is a teacher with at least a recognised bachelor's degree.

7. Gross Enrolment Rate (GER)

✍✍ The GER gives information on the extent of participation of a specific school-going age group population in a specific level of education.

✍✍ GER at primary level is calculated by relating population in age group 5 – 11 to the enrolment in primary schools.

✍✍ GER at secondary level is calculated by relating population in age group 12 – 16 to the enrolment in secondary schools.

8. Net Enrolment Rate (NER)

✍✍ The NER gives information on the extent of participation in a given level of education of children belonging to the official age-group corresponding to the given level of education.

✍✍ NER at primary level has been calculated by grade (from K to grade 9), by relating the population in ages 5 to 14 to the enrolment in those grades.

✍✍ NER at secondary level has been calculated by form (1 to 5), by relating the population in ages 12 to 16 to the enrolment in those forms.

9. Age Specific Enrolment Ratio (ASER)

✍✍ The ASER gives information on the extent of participation of specific population ages in a specific level of education.

✍✍ ASER at secondary level has been calculated by relating the population, ages 10 to 19, to the enrolment of these ages in secondary schools.

10. Female Participation Rate

✍✍ The percentage share of females in the total enrolment is computed to determine gender participation at a given level of education.

11. Transition Rate

✍✍ Transition Rate is calculated by relating the number of graduates who join the next level of education in a given year to those who graduated from the lower level in the previous year.

✍✍ Transition from primary to secondary level is calculated by relating the number of students who sat the CEE in a given academic year to the intake in Form 1 in the secondary schools during the next academic year.

12. Flow Rate

- ✍✍ Flow Rate is calculated by following a cohort of students who join a given class in a given year and move to the next class in the subsequent year.
- ✍✍ When using flow model technique for projection of enrolment, flow rates are used for carrying forward students from one class in a given year to the next class in the subsequent year.

13. Dropout Rate

- ✍✍ The Dropout Rate is calculated by relating the number of students who dropped out during a given year to the enrolment in the beginning of the year.

14. Repeater Rate

- ✍✍ Repeater Rate is the number of students repeating from a particular year divided by the total enrolment in that year.

15. Percentage of Repeaters

- ✍✍ Percentage of Repeaters is calculated by dividing the number of students repeating in a current year by the total enrolment of that year, expressed as a percentage.

16. Expenditure per Pupil/Student

- ✍✍ Expenditure per pupil/student is calculated by dividing total expenditure allocations to a given level of education by the enrolment at that level.

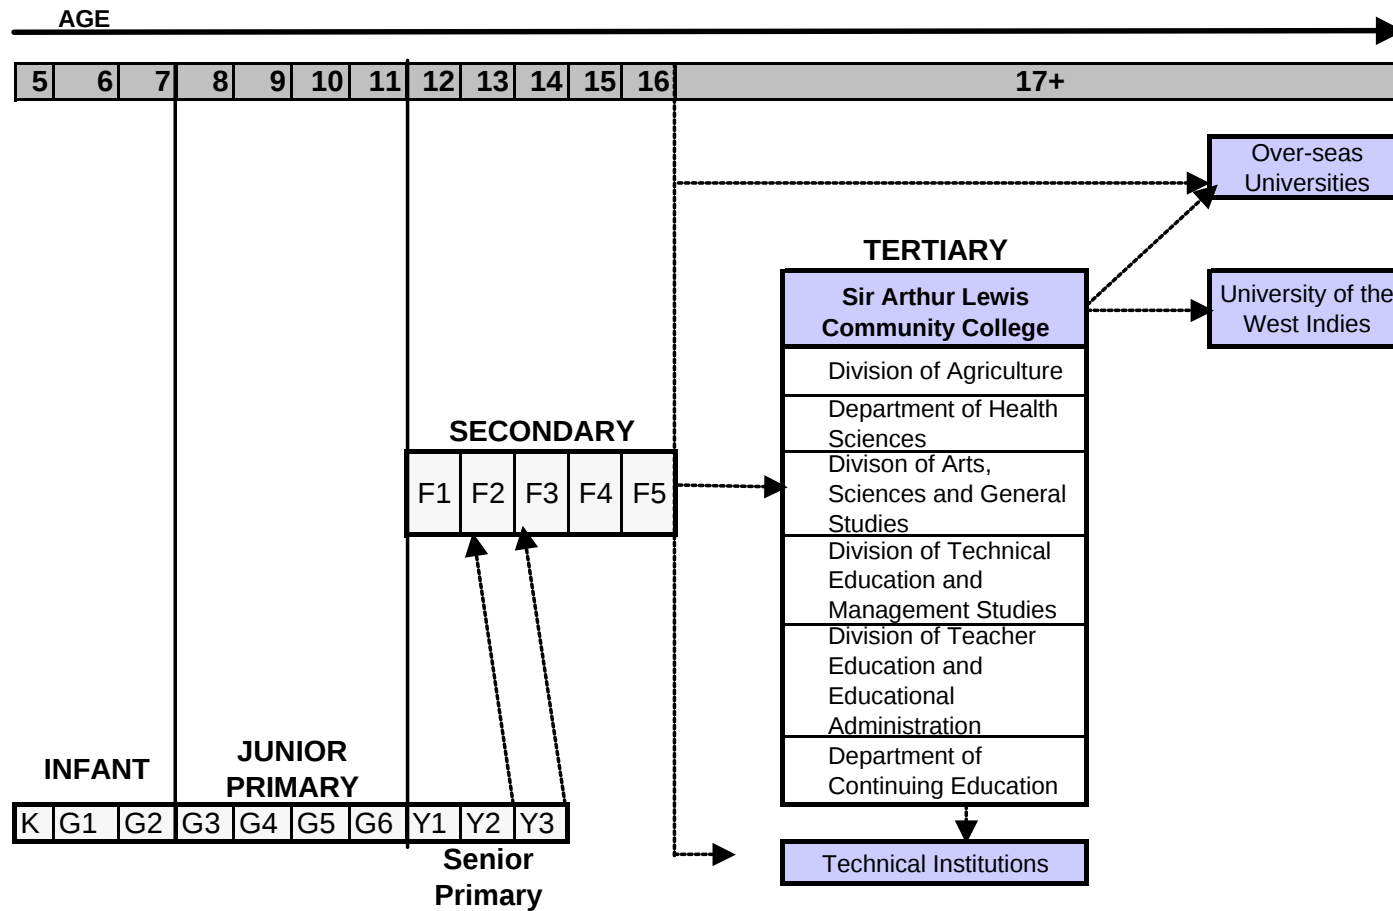

17. Infant, Junior Primary, Senior Primary

- ✍✍ Please refer to the flow diagram of the Structure of the Education System on the next page.

Notes :

- Figures for 2000/01 are actuals
- Kindergarten enrolment has been projected by assuming it to be equal to the estimated population of 5 year olds based on population projections prepared by the Government Department of Statistics.
- Enrolment projections from Grade 1 to Grade 6 have been prepared with the help of the Flow Model Technique and a constant flow rate of 99% has been applied throughout the projection period for all grades.

Note:

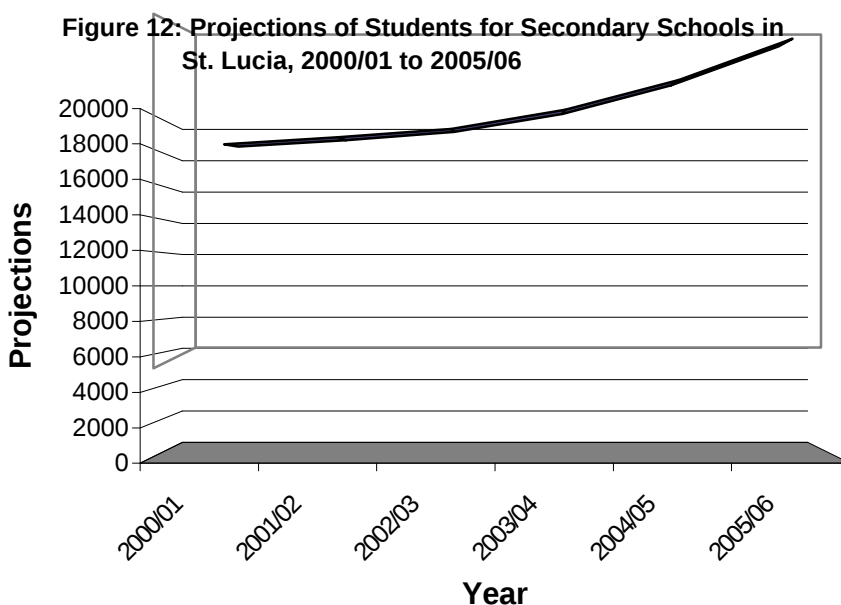

Table 87 shows that the transition rate from # who sat CEE to Form 1 has increased from 43% to 55% during the years 1995/96 to 2000/01. Because of the Government Policy to achieve 99% transition rate by 2005/06, transition rates for 2001/02 to 2004/05 have been linearly interpolated. (That for 2001/02 is assumed to be the normal 3% increase.)

Enrolment in Forms 1 to 5 for 2000/01 and number sitting CEE for 1999/00 and 2000/01 are actuals.

Flow Model Technique has been used to project enrolment figures for the remaining years as shown in the Table and a constant flow rate of 99% has been used for all forms.

However, in Forms 2 and 3 an additional 0.7% and 2% of the previous grade have been added, representing students from grade 9 writing special exams.

Since all 11 and 12 year olds are eligible to write the common entrance exams, the Number sitting exam from 2001/02 to 2005/06 represents 92% of all 11 year olds in the population (since about 8% are already enrolled in secondary schools), and 55% of all 12 year olds (since an average of 45% are enrolled in secondary schools).
