ANAESTHETIC AND INTENSIVE CARE:

A CASE BOOK

AJIT I. UDIT

This case book prepared as part of the Doctorate in Medicine Part 2 Anaesthetic Programme contains fourteen case report and one group study of anaesthesia done by me under consultant supervision. One case was done at the University Hospital of Wales, Cardiff and all others at Port of Spain General Hospital.

All cases contained in this book were seen preoperatively, a detailed history taken, a full examination done, investigations reviewed and appropriate recommendations made. Only relevant results of investigations and necessary diagrams, charts and graphs are provided.

The discussion accompanying each case or group study represents current anaesthetic trends and comparative practices at Port of Spain General Hospital.
