

Steelband gets strong focus at Expo

STEELBAND will form an integral part of the entertainment and culture package at CARNIVAL EXPO-89 now being staged at the West Port of Spain Regional Park Complex

off Wrightson Road, Port of Spain.

Pan Music

Several steelbands will participate in events at the Exposition during its six-

week tenure. There will also be pan-around-the-neck steelbands performing at various points throughout the exhibition.

Apart from providing musical en-

tertainment, these pannists will provide for mini jumpups for willing patrons. This, of course complements the carnival historical centre which will host daily lectures on the steel-

band, calypso and mas'.

'Mas' will be featured with the help of pictorial and costume displays and patrons will even have the opportunity and short-lived luxury of actually wearing some of the costumes.
