

ABSTRACT

ANAESTHETIC AND INTENSIVE CARE CASE RECORD AND COMMENTARIES

ESAU EDWIN JOSEPH

The case book presented by the author for the Doctorate in Medicine (Anaesthesia), consists of actual anaesthetic cases performed on patients in Trinidad. The author was directly involved in the management of these patients both before and after surgery. There is also an inclusion of a few interesting cases that were selected during time spent in the Intensive Care Department of the Port-of-Spain General Hospital, Trinidad.

The reasons for the choice of anaesthesia selected for each patient are outlined as well as a review of the current literature surrounding each case. A total of 14 cases are presented.
