

Common Weeds in Vegetable Production in the Caribbean

Agri-Technicians' Edition

**Wendy-Ann P. Isaac
Richard A.I. Brathwaite
Wayne G. Ganpat
Terry J. Sampson**

This publication is meant to assist readers, targeting mainly agricultural technicians, with the knowledge and skills to identify non-crop species. It provides information to integrate these non-crop species into farming systems in an attempt to minimize the use of herbicides. This book could also be used as a Handbook for students of agriculture at all levels.
