

## Computer Aided Production Management in Trinidad and Tobago : A Critical Appraisal

J. A. Bailey

### A B S T R A C T

This report presents the results of a survey on the use of computers as a basis for supporting routine or programmable, decision-making functions in local manufacturing industry. Comparisons are made between small and large companies, companies with different nationalities of ownership, companies in the various manufacturing sub-sectors and in the types of companies surveyed.

Particular attention is given to the level of development of users and their status on the development of the information infrastructure needed to support computer integrated systems in production environments.
